Henry's Software

Setup

After you install HS Equipment Service then double click the icon on your desktop, the program will start then you should see the Setup MS SQL connection window.

Recommended: SQL Server 2017 Express edition

Note: You will need to configure the SQL server to work over TCP/IP

1. Enter the IP address and Port number of your SQL server.
2. Enter the user name
3. Enter the password then click create DB
4. Then click save settings

If all is good then click login on the top left of the main window.

Default Users:

View only.
1. **Username** = User **Password** = 12345

Enter service logs.
2. **Username** = service **Password** = 12345

Full access
3. **Username** = admin **Password** = admin123
