

## Salmon Assist Help Files Net to Cage Assignment Screen

### Step 1 Creating a Net to Cage Assignment Record

This screen is used by the system to capture details of assigning a Net onto a Cage. Some things to note are the Net Use Type field which allows you to assign many nets to the same cage for example a predator net, and inner and outer net and a bird net.

This screen is also used to un assign or remove the net from the cage and this is simply done by selecting the Date Un-Installed.

The screenshot shows a software window titled "Net to Cage Assignment". The interface includes the following fields and controls:

- Top Row:** Cage ID (text box with a question mark icon), Current Fish ID (yellow text box), Net No (text box with a question mark icon), Current Fish Count (red text box with value 0), Date Installed (calendar icon with date 07/02/2005), Days Assigned (yellow text box with value 0).
- Second Row:** Cage Size (m) (yellow text box), Comment (text box with a right-pointing arrow icon).
- Third Row:** Net Use Type (dropdown menu), Date Un-Installed (calendar icon with date 07/02/2005), Uninstall Location (dropdown menu with value (None)).
- Fourth Row:** No of Previous Days at Sea (text box).
- Buttons:** Src Net Change, Dest Net Changes, Net Scores, Nets Washed.
- Navigation:** A set of four arrow buttons (left, right, up, down).
- Bottom Row:** Save, Find, Delete, Reset, Print, Recalc, Cancel, Help, Import.
