**Salmon Assist System**  
**Setting up a Fish Id**

**Step 1 Creating Fish Ids**

The Fish Id screen controls the stock in its traceability throughout the system. The Fish Id is a batch no that is normally made up of the Year Intake, the Batch No, and then some kind of code for the number of times the Fish Id has been graded through out its life.

The screenshot shows the 'Fish ID' window with the following fields and controls:

- Details | Extra Info | Start Weight Info** (Tabs)
- Fish ID** (Text field)
- Current Cage ID** (Text field)
- Current Mooring ID** (Text field)
