TIFF Pilot 3.0
Release Notes

1	UPGRADING FROM VERSION 2.X

- Version 3.0 may be installed in parallel with version 2.x to enable testing.

- Configuration parameters previously set in tpconfig.inc must now be set in web.config.

2	NEW FEATURES

1. System and Browser Support

- Support for IIS 7 under Windows Vista and Windows 2008.

- IIS 5.1 and 6 under XP Professional and 2003 will still be supported.

- Confirmed Support for 64 bit versions of windows via IIS configuration (see
  http://support.microsoft.com/kb/894435)

- Support for versions of Adobe Reader up to 9.0

2. Text and PDF File Type Support

- Text files can now be passed to tiffpilot.aspx and a PDF document will be generated.

- PDF files passed to tiffpilot.aspx will be passed directly to the browser.

3. Save PDF

- A new option (SPDF) is available to enable the generated PDF to be saved rather than displayed.

4. Security and Auditing

- A source DLL method is made available to allow customers to build their own custom methods for security module allowing custom security checks.
